

LANCASTER PAS 68 AUTOMATED BOLLARDS

The Lancaster Automatic Crash Rated Bollards are designed to protect localised areas within a perimeter with an unobtrusive barrier capable of arresting the progress of a hostile vehicle. The high security retractable bollards have been successfully tested to the highest standards for arresting vehicle attacks.

- Reliable and proven hydraulic operation
- Stand-alone system for outer boundary protection or target hardening within a perimeter
- Maybe retrofitted to reinforce any existing security fence
- Easily interfaced with a variety of dedicated access control systems
- Option to operate each bollard separately
