

How to specify risk appropriate fencing and gates in the education environment

Seminar details:

From the fencing around its perimeter to the main entrance gates, a visitor gets a clear impression of a school's commitment to safety and security well before entering its grounds. This seminar discusses the various designs and styles of fencing to match the risk, from the perimeter to play areas, helping specifiers in the decision making process.

Learning aims:

- The role of security and safety in the education environment
- Balancing security with aesthetic considerations
- Risk assessment process
- How to specify the correct level of security around a school environment for varying risks
- Design details and specifications of different fencing and gate types
- Safety and security guidance on automatic gates
- Security certification and standards
- Other types of specialist, application specific fencing and gates in the education environment
- Environmental impact and sustainability

Locations covered:

- Midlands
- London
- North West
- North East
- South East
- South West
- Wales
- Or ask for a virtual session
