Estate

CONFIGURATION

Depending on the size of the opening and specification, you will need to choose between a single or double leaf configuration

Opening Action

The type of site you are specifying for, the space available, and the speed at which the gate needs to close, will determine the gate opening action you choose. The security application also needs to be taken into consideration.

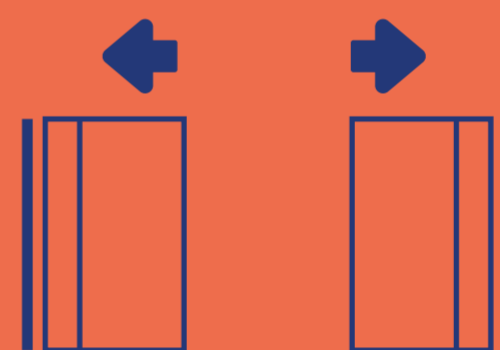

We also offer a range of automation options using our in-house automation systems for each type of gate opening action. All our gate automation is CE marked and installed to current safety standards.

Swing

Slide

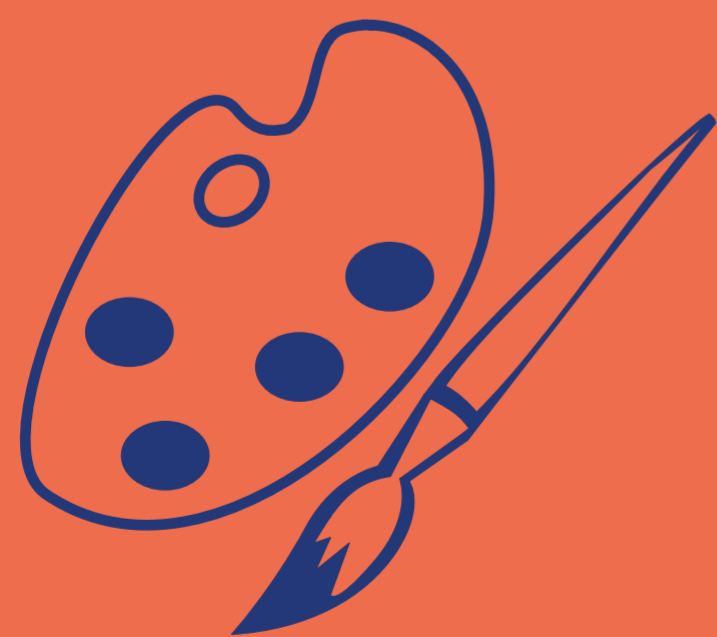

Bi-Fold

Height & Width

Our gates are available in both standard and bespoke sizes which are made to measure, to your project specifications.

Tell us the height and width of the opening and whether you require automation so we can determine the correct size of the gate.

**WIDE RANGE OF COLOURS
AVAILABLE UPON REQUEST**

Colour

All of our steel gate designs are supplied galvanised to BS EN 1461 as standard, and they can be powder-coated RAL 9005 Black, RAL 6005 Green, RAL 3020 Red, BS 20-C-40 Blue, RAL 5010 Blue, RAL 7012 Grey, RAL 1018 Yellow, RAL 9010 White, and RAL 8017 Brown at an additional cost.

Non-standard RAL colours can be arranged at an additional special surcharge.

We also offer marine coating for sites near an estuary or the sea.

We manufacture a wide range of automated gates with bespoke size options, vehicular or pedestrian configuration, and different types of opening action
