

CAR BAR

**Jacksons
Fencing**

The Car Bar provides a unique security solution for car showroom owners and people who operate parking facilities. New to our portfolio the Car Bar has been specifically designed as a parking and traffic control barrier, offering security and convenience.

The Car Bar has an internal lockable barrier that requires no additional space as the retractable security bar is inside the existing barrier tube. This unique feature allows an obstacle free space of up to 3.5 metres to be opened to move cars. With posts staged at intervals the system provides a non-intrusive solution to security which allows pedestrians to view vehicles outside normal operating hours.

- Unique security solution for car showrooms and parking facilities
- Internal lockable barrier designed to provide security and convenience
- Space efficient with retractable security bar located inside barrier tube
