

# COBRA SPIKE ROTARY

JSW 68 Issue 01

**Jacksons  
Fencing**

Cobra Spike Rotary is an aggressive rotating anti-climb wall spike manufactured for high security sensitive installations.

Cobra Spike Rotary is made up of two lengths of modified Cobra spike affixed to a 3.0m x 41mm galvanised tube. These units are installed using a bracket, which has a stub axle on that runs through the bracket, this leaves it free to turn providing an unstable barrier that is extremely difficult and dangerous to try and negotiate.

## Features

- Virtually impossible to climb over
- Highly aggressive physical and physiological barrier
- Heavily ribbed for strength
- Galvanised against corrosion
- Maintenance free

\*In some cases, the installation of security extras may require planning permission or Building Regulations approval, if in doubt, please consult your relevant Local Authority department.

## APPLICATIONS

- High Security
- Prisons
- Medium Risk
- Walls, gates, fences
