

Hedgehog Friendly Gravel Board

Introduced in 2015, the Hedgehog Friendly Gravel Board was designed in response to the decline in hedgehog numbers in the UK. For use with our slotted Jakposts with a hole at one end, it is large enough to allow hedgehogs free passage, and has reinforcing strip along the top of the board to ensure strength is retained.

- All timber used throughout is superior quality Jakcure® treated softwood guaranteed for 25 years.
- All fixings are stainless steel.
- Designed for use with slotted Jakposts.
- Reinforcing strip along top of the board to ensure strength.
- Used when panels are in contact with the ground as part of the 25 year Jakcure® guarantee conditions.
- Gives extra height to a fence.
- Helps to save hedgehogs.

Specification

Gravel Board Height: 140mm
 Width: 1.83m
 Depth: 28mm
 Packers: 22mm
 Stock code: 667610

Hole dimensions
 Height: 96mm
 Width: 160mm

If you need to reduce the width of the Hedgehog Friendly Gravel Board on site, always use Jakcure® End Grain Treatment on any cut timber.

Hedgehog Friendly Gravel Board for Non-Panel Form Panels

For a hedgehog friendly version of the Traditional Fencing (non-panel) gravel board, we suggest customers cut the gravel board on site and use a small peg to support the fence rail. The support pegs are also used to prevent gravel boards distorting when more than one is used to increase height.

Support Peg
 600mm x 50mm x 50mm
 Stock code: 644400
