

# Acoustic barriers to environmental noise pollution

## Seminar details:

With the growing impact of environmental noise on people, planning and architecture, we discuss the choice and specification of acoustic barriers. We'll provide you with information and insights on the impact and causes of environmental noise, how noise propagates, what legislation exists to combat it, how it impacts on the landscape and the effects it has on planning. We'll then look at the options and performance characteristics of barrier solutions and their pros and cons.

## Learning aims:

- Sources of environmental noise pollution
- The impact of noise on society
- Propagation of noise
- Noise, legislation, the landscape and architecture
- Reducing effects of environmental noise
- Performance, sustainability and relative costs of noise mitigation solutions

## Locations covered:

- Midlands
- London
- North West
- North East
- South East
- South West
- Wales
- Or ask for a virtual session
