

Gate automation, legislation and safety, why take the risk?

Seminar details:

Both pedestrian and vehicle gates and barriers are essential to the safety, security and accessibility of a site, they serve as a safety device and security checkpoint but also have the potential to present a high risk to site occupiers and visitors. The seminar covers how to specify automated gates and barriers that will have suitable performance and durability, and also comply with all the relevant standards and legislation, highlighting the risks for each type of gate system.

Learning aims:

- Key considerations for different types of gates, operating systems, and their application
- Risk assessment
- Calculating lifetime cost
- Maintenance and repair
- Best practice
- Applicable legislation and standards
- Manufacturers' assurances

Locations covered:

- Midlands
- London
- North West
- North East
- South East
- South West
- Wales
- Or ask for a virtual session
