

A guide to appropriate and effective perimeter security

Seminar details:

There are now a variety of different applications and rationales behind the installation of physical security measures. This presentation give insights on the perimeter security products available, along with the points to watch and consider when specifying and selecting the most appropriate and practical solutions for the types of site you are likely to be involved in.

Learning aims:

- Perimeter security design and installation, specifically fencing, gates and vehicle barriers
- The standards applied to evaluate the performance of perimeter security products
- How materials and their treatment affect the resilience and lifetime performance of perimeter security products
- The range of products available
- The importance of inspection and the vital role scheduled maintenance and repair plays in the integrity of perimeter security products

Locations covered:

- Midlands
- London
- North West
- North East
- South East
- South West
- Wales
- Or ask for a virtual session
