Quality that lasts  
Fencing & Access Solutions

The J Series bollard represents a new generation access control solution. Many design innovations make it easy to handle and install but best of all its performance is market leading and lifetime costs exceptionally competitive.

Activated by any access control system or signalling device, it is an alternative solution to fixed posts and barriers, allowing regulation of traffic into certain zones with high vehicle flow, (e.g. restricted areas, pedestrian areas, parking and industrial sites and many more). Available with a diameter of 275mm, and a height of 600mm or 800mm.

The bollard was designed and tested in order to optimise installation, servicing and maintenance activities whilst maintaining maximum reliability over its lifetime.

The fixed bollard is suitable for installations when all bollards don't need to be automated, the fixed bollards can maintain aesthetic appearances for sites, thus reducing costs and time of installation.

|   | J 275/600 F  | J 275/800 F |
|---|--|-------------|
| Cylinder height                                   | 600 mm   | 800 mm      |
| Cylinder diameter                                 | 275 mm   |             |
| Cylinder material                                 | Steel Fe 360   |             |
| Cylinder material special release stainless steel | AISI 316   |             |
| Cylinder surface treatment                        | Cataphoresis plus polyester powder painted dark grey metallised RAL 7021 |             |
| Head surface treatment                            | Anticorodal case aluminium RAL 9006                                      |             |
| Reflective strip                                  | Standard height 55 mm  |             |
