Jacksons Fencing

Height restriction barrier (with access) is made with square hollow section posts in a single and double configuration with a maximum road width of 10m. Designed to suit your specific road with and height requirement. Supplied galvanised as standard or powder coating as an optional extra. Padlockable in the open and closed positions.

- Swing arm height restriction barrier constructed with 150x150mm
- Baseplated Hanging and Slam post
- The locking bolts and handles can be padlocked to the slam post (on singles) and to hanging posts (on doubles) when the barrier is either open or closed.
- The handle(s) are used to release the central locking mechanism and to move the barrier leaves. The security plate prevents the barrier from being forced off the locking bolt.
- Adjustable gate hinges allow easy operation of the barrier leaves which can be locked closed or open in either 90 or 135 degree positions

Warning Sign for Max Hite Barrier

- 1200 x 150mm reflective aluminium
