Rota Spike

The ultimate fence and gate topping deterrent Rota-Spike can additionally be utilised on buildings, to protect vulnerable points, for example windows and roof parapets.

- Sharp steel blades rotating on a steel tube
- Easy to install almost anywhere!
- Can be supplied with brackets for fixing above any type of fence, gate or wall and between walls and openings
- Galvanized to BS EN 1461 as standard or galvanized and powder coated to BS EN 13438 in one of our standard colours at extra cost
- Powder coating to any other BS or RAL colour to special order
- Supplied in 6.0m lengths
- Inner tube 41.5mm dia.
- Blades: 90mm long outer tube 48.3mm diameter
- Fixing: Brackets at 3m centres when horizontal and 2m when vertical.

- Supplied 6m lengths
- Inner tube 41.4mm Ø x 2mm thick
- 70 Rota Spike per tube per 6m
- Fixed at 3m centres (top of wall)
- Fixed at 2m centres (face of wall)

Cobra Spike (also known as Razor Spike)

Cobra-Spike is a Secured by Design accredited product designed for use on the tops of fences, gates or walls

- Supplied in 1.5m lengths
- Spikes 110mm long
- Spike pitch 80mm
- Spike depth 95mm
- Pre-drilled 50mm wide base ready for fixing
- Galvanized to BS EN 1461 as standard or galvanized and powder coated to BS EN 13438 in one of our standard colours at extra cost
- Powder coating to any other BS or RAL colour to special order
- Easy to install to any solid surface, old or new, wooden or steel fencing, walls or gates

- 1.5m long
- 110mm long spikes
- Pitch of spikes 80mm
- Width of base approx 50mm

Note: We recommend 'Danger Signs' are used every 8-10m and change in direction along a fence line incorporating security extras capable of causing injury even through misuse.

Fence and Wall Spikes

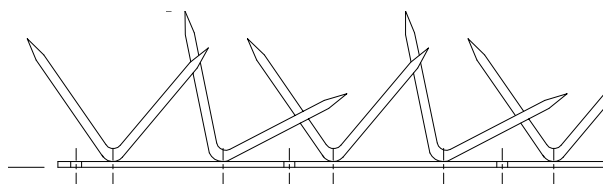

Specifications and Technical Data

Viper Spike

Viper Spike represents a new dimension in security - more imposing than barbed wire, it offers a forbidding deterrent to the would-be climber. Designed to form a three dimensional barrier, its strong 170mm long 10mm diameter spikes are complete with extremely sharp points.

- Can be fitted both vertically or horizontally to protect walls and pipes/pylons
- Pre-drilled base ready for fixing
- Galvanized to BS EN 1461 as standard or galvanized and powder coated to BS EN 13438 in one of our standard colours at extra cost
- Powder coating to any other BS or RAL colour to special order
- Easy to install to any solid surface, old or new, wooden or steel fencing, walls or gates
- Ideally suited to protect a wide variety of access points or assets including electricity masts and other important installations.

- 1.1m long
- 40 x 6mm flat bar
- 9 pairs of spikes 10mm diameter
- Width (including spikes) 230mm
- Height 170mm

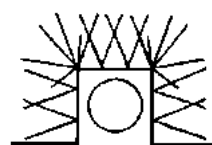

Viper Spike 3

Viper 3 is designed to prevent intruders from climbing drainpipes or other vertical structures. Available at 200mm wide x 150mm stand-off as standard or made to measure to suit applications.

- 150 x 200 x 150mm wide
- 8 pairs of spikes
- 40 x 60mm flat bar

Note: We recommend 'Danger Signs' are used every 8-10m and change in direction along a fence line incorporating security extras capable of causing injury even through misuse.
